Keynote Talk 3

Trust Management and Privacy Preservation
in Wireless and Sensor Networks

Professor Wanlei Zhou

Chair Professor of Information Technology and Head,

School of Information Technology,

Deakin University, Melbourne, Australia,

email: wanlei@deakin.edu.au.

Abstract:

Because of the wireless transmission requirement and the self-organizing nature of its architecture for a Wireless and Sensor Network (WSN), the trust management and privacy protection for WSNs have become an especially challenging problem. In this talk, we analyze current threats and attacks in WSNs and survey state-of-the-art trust management and privacy protection schemes in WSNs. Then we classify and describe trust management schemes into two aspects in secure routing and secure data, respectively and privacy protection schemes into data-oriented and context-oriented privacy, respectively. Finally we try to present a clear direction to design and construction of trust mechanisms and privacy protection techniques in WSNs and discuss some interesting and challenging open issues on this topic.

Short Biography:

Professor Wanlei Zhou received the B.Eng (Computer Science and Engineering) and M.Eng (Computer Science and Engineering) degrees from Harbin Institute of Technology, Harbin, China in 1982 and 1984, respectively, and the PhD degree from The Australian National University, Canberra, Australia, in 1991. He also received a DSc degree (a higher Doctorate degree) from Deakin University in 2002 for his substantial contribution to knowledge and authoritative standing · in the field of distributed computing. He is currently the Chair Professor in Information Technology and Head of School, School of Information Technology, Deakin University. Before joining Deakin University, Professor Zhou served as a system programmer in HP at Massachusetts, USA; a lecturer in Monash University, Melbourne, Australia; and a lecturer in National University of Singapore, Singapore. His research interests include theory and practical issues of building distributed systems, security and reliability of computer networks, bioinformatics, and e-learning. Professor Zhou has published more than 200 papers in refereed international journals and refereed international conferences proceedings and has edited 5 books and authored 1 book. He has also chaired a number of international conferences. Prof Zhou is a Senior Member of the IEEE.
