

Call for Demos and Exhibition

The 9th IEEE International Conference on Autonomic and Trusted Computing (ATC-2012)

Fukuoka, Japan, September 04-07, 2012
<http://conf.kyusan-u.ac.jp/atc2010/>

The ATC 2012 demo/exhibition program provides researchers and engineers with opportunities to show their cutting-edge work presented in an interactive fashion. The live demonstrations and exhibitions may include implementations of techniques presented in the main conference, workshops, other conferences and venues, as well as systems and video. We encourage companies or other commercial entities or laboratories to participate in showcasing their products. **Prospective applicants should submit a 2 to 3-page paper of the demonstration/exhibition in the IEEE-CS CPS-format via email to: atc2012demo@gmail.com.** Video demonstrations are also welcome. The main selection criteria will be the expected general interest of the demonstration to the Ubiquitous Intelligence and Computing community. The accepted demo/exhibition will be included in the CPS conference proceedings. As a condition for acceptance, at least one of the people must be registered for the main conference, and present the demo in the conference. All demos will compete for the Best Demo Award. The conference will at minimum provide a space for your demo, a poster stand, a table and chairs, and a power connection (100V). If you need any special equipment you should provide that by yourself, including power converters, projectors, audio amplification, wireless LAN, etc.; please specify this with a separate page so that we can plan the demo area accordingly.

Demo/Exhibition Chair (Email: atc2012demo@gmail.com)
Minoru Uehara, Toyo University, Japan

Important Dates:

- May 15, 2012 - Submission deadline
- June 15, 2012 - Notification of acceptance
- June 28, 2012 - Final Manuscript Deadline
